

Report of National Deworming Day celebration at Urban Health Training Centre, Ratanpar

Date: 10/02/2020

Deworming activity was carried out at Anganwadi Centre of Urban Health Training Centre, Ratanpar under the guidance of PSM Department, C.U.Shah Medical College.

Health team including Female Health Worker, Anganwadi worker and Asha worker carried out house to house visit and advised them to give dose of Albendazole to children of age group of 1 to 19 years on 10th of February.

As per pre-decided planning, activities of National Deworming Day started with a lecture on awareness regarding worm infestation by Intern doctor posted at UHTC, Ratanpar. She also taught to the beneficiaries about the importance of personal hygiene in her speech.

After that, AWW started giving Albendazole to the children one by one. She also asked them to receive second dose of Albendazole in August 2020.
